

DIADEM-150

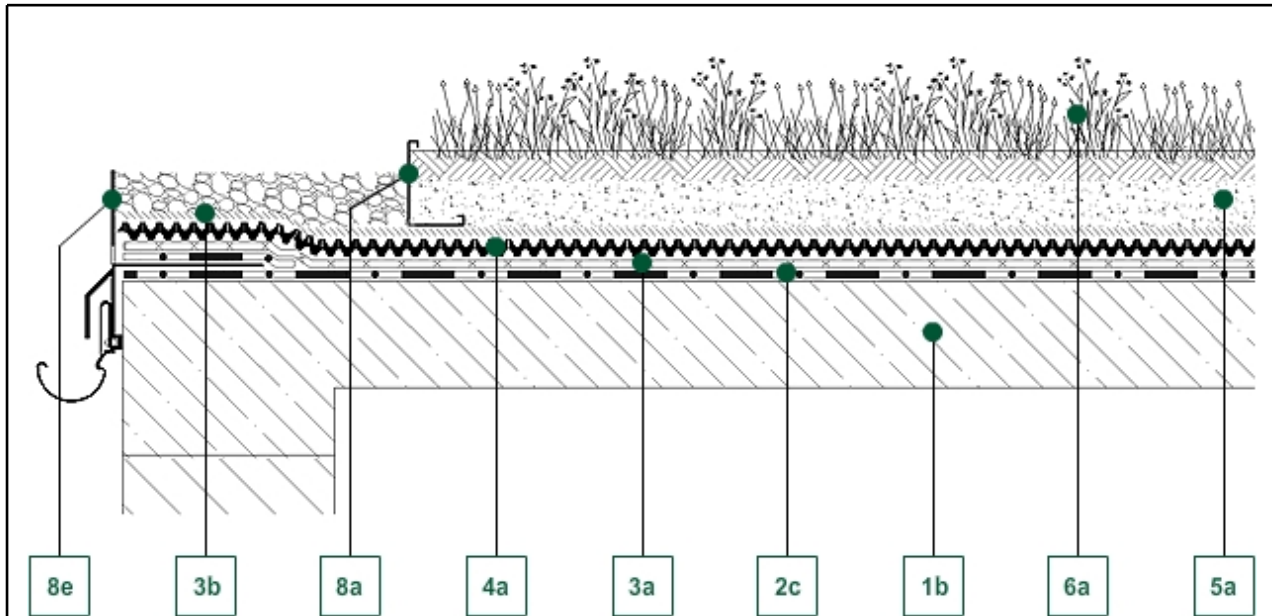

EDGE / KLS EDGE PROFILE

#901317_E150_01

Detail Drawing

■ Green up the roof!

Decking constructions:

1b - Reinforced concrete structure

Water isolation:

2c - Waterproof membrane

Geotextile layers:

3a - VLU-300 mechanical protecting layer

3b - VLF-150 filter layer

Drainboards:

4a - DD-25H drainage board

Growth medias:

5a - SEM-12 extensive growth medium

Vegetation:

6a - Drought-resistant perennials

Edging element:

8a - KLS-AL-8/12 Gravel Board

8e - RDL edging

This product is not available in your region.

Description of section:

Where the roof does not have a perimeter parapet wall, the RDL Edge Profile provides solution how to retain the garden elements, whilst still allowing the free flow of rainwater to the roof gutter. In addition, this profile ensures the layers of the roof garden is obscured from view. The required gravel border around the perimeter is achieved by means of separating the planted area by the use of the KLS gravel board. The boards also prevent the spread of plants into the gravel border, thereby reducing maintenance.
