

TGS-40

Roof outlet inspection box areas with vehicle traffic

140302

KEY FEATURES

- vandalism resistant
- easy to maintain
- fits flexibly to local height conditions

APPLICATION

SPECIFICATION

TGS boxes for intensive green roofs with a minimum of 10" build-up depth to ensure water drainage both in the drainage layer, and on the surface as well. The removeable lid ease the maintenance of the water outlets, and yet protects the outlets from severe external effects. TGS products can be used on both public places and places where traffic of personal vehicles to expect.
