

# DIAflor Sedummat Roll

500111

Pre-vegetated sedum roll with at least 85% coverage right at delivery

## KEY FEATURES

- Easy to handle by skilled and private installers
- Quick establishment rate
- Reduces weed intrusion
- Can reduce delivery costs
- Provides instant vegetation

## APPLICATION

Although pre-vegetated products have a bigger carbon footprint, they are still useful in certain market segments such as projects in need of instant green. The Sedum Rolls are 48"x75" sized rectangles, saturated weight is 5.0 lbs/sqf, which can easily be operated even to hard-to-access roofs.

## SPECIFICATION

Pre-vegetated mats are sod-like, pre-germinated mats that achieve immediate full plant coverage. These mats are lightweight and easy to install, nevertheless the mats have 85 percent coverage or better right at the delivery. They are typically planted with ten to twelve different species of Sedum. Pre-vegetated mats quickly establish on a green roof and provide immediate erosion control and minimize weed intrusion. After the establishment period, pre-vegetated mats require minimal maintenance with little watering and weeding. Standard sizes: 48"x75".

## TECHNICAL DATA

Sedum acre 'Gold Moss': (Zone)	4-7
Sedum kamtschaticum 'Variegatum': (Zone)	4-7
Sedum floriferum 'WG': (Zone)	3-7
