#160201

Manual

■ Green up the roof!

Application:

RDL edges could be used, in the edging of terraces and green roofs, or separating different areas to give a special design to the roof landscape. They are important distinctive pieces in the development of a garden layout. In addition, these units has practical function too, as it could be used to house, trunking for electrical cabling or irrigation hoses. For decorative purposes lighting could be mounted into the front panel.
