Slab spacers for the perfect drainage of paved areas
#610116

Manual

■ Green up the roof!

| | |
|---|--|
|  A 3D perspective view of a white, T-shaped plastic slab spacer. It consists of a flat rectangular base with a vertical stem rising from the center. | <p>Application:</p> <p>Paving slabs for terraces on building structures must be loose laid with permanent spacing between the slabs. Providing a permanent space between slabs enhances drainage properties even on sandbed or substrate. Ensuring equal spacing between the slabs and increasing the aesthetic value of the overall paving layout by forming a distinctively clear and even pattern.</p> |
