Hydrotechnical products:

- 7e1 - TRH-8/12 terrace grid with adjustable height
- 7h - RNH-8/12 Roof Channel

Terraces accessories:

- 9a - FK-5 Slab spacer

Description of section:

Rainwater from the vertical surfaces of the building can often be as much as that accumulating from the horizontal roof surface. It is therefore crucial that these details designed properly preventing water flooding into the building. The RNF Drainage Channel delivers a perfect solution. Paving slabs should be laid with open joints and kept permanently separated by the use of FK Paving Spacers. The TRH provides a cover for the rainwater outlet and is height adjustable in order to accommodate tolerances in the laid paving.
