

FKK-3

Slab spacers for the perfect drainage of paved areas

610117

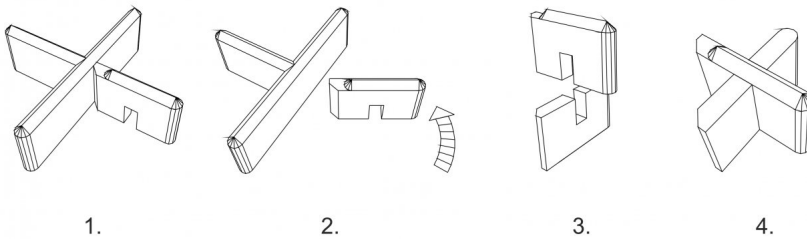

KEY FEATURES

- Increases a drainage capacity of the paved areas
- Same product for cross and T-joint spacers
- Purposely broken spacers can be reused
- Available in 4 joint sizes and two different colors
- Future slab repairs can be carried out more easily

APPLICATION

Paving slabs for terraces on building structures must be loose laid with permanent spacing between the slabs. Providing a permanent space between slabs enhances drainage properties even on sandbed or substrate. Ensuring equal spacing between the slabs and increasing the aesthetic value of the overall paving layout by forming a distinctively clear and even pattern.

SPECIFICATION

TECHNICAL DATA

Height: (mm)	18
Width: (mm)	50
Length: (mm)	50
Weight: (kg/unit)	0,55
Material:	Recycling-Polystyrol
Colour:	limpid
Packaging unit: (pieces/carton)	3000
