ADZ-2.0

Self-ballasting Fencing system, that does not penetrate the roof membrane.

KEY FEATURES

- Easy and quick installation
- Installation without penetrating the roof layers
- Perfect drainage under fencing

APPLICATION

OSHAs strict legal requirements calls for a proper safety management program for employees working at heights. The ADZ fencing system is suitable for cordoning off roof areas with different function, such as walkway demarcation, assuring open elevator shafts, skylights, and fulfillment of other prescribed safety requirements. The system could be combined with off-the-shelf generic handrail solutions, too be able harmonize the design of your building.

(1)MDE-60 Mounting Board, (2)Base Rail, (3)Base Plate, (4)Tilting Screw, (5)Hosting Element, (6)Fence post

SPECIFICATION

DIADEMs ADZ is a safety fencing for preventing fall, or restrain unsafe areas. The system is fulfills all the legal and the technical requirements and yet not penetrating the membrane and not blocking the drainage of the roof structure neither. The system includes MDE-60 composite structural board, Hot dip galvanized Baserail, Stainless steel tension cable and Supporting Discs. The simplicity of the system allows you an installation of a 600 foot run by 2 people in 8 hours, saving you time and money where it counts most - on site.
