

ADZ

710602

Self-ballasting Cordoning, or Fencing system, that does not penetrate the roof membrane.

KEY FEATURES

- Easy and quick installation
- Installation without penetrating the roof layers
- Perfect drainage under fencing

(1)ADZ Fencing System, (2)Vegetation, (3)Paving slab, (4)Substrate, (5)VLF filter geotextile, (6)Gravel, (7)MDE-60 mounting board, (8)VLU mechanical protection geotextile, (9)Waterproofing membrane, (10)Thermal insulation layer, (11)Vapour control layer, (12)Roof construction

APPLICATION

The ADZ fencing is suitable for cordoning off areas with different function, without penetrating the roof membrane, and yet offering perfect drainage underneath. The system can be used for roof edge fall prevention, walkway demarcation, stairwells, open elevator shaft fall protection, skylight fall protection, and fulfillment of other prescribed safety requirements.

SPECIFICATION

The Diadem's self ballasting handrail system can ensure the proper safety and well being of users who access a building roof top. In addition to providing safe access to a roof top, Diadem's unique design makes it simple to install and offers long term durability. The DIADEM ADZ is a safety fencing and/or cordoning system, comprising the MDE-60 composite base and fixing brackets.

TECHNICAL DATA

Height: (inch)	48-3/8"
Width: (inch)	35-1/2"
Length: (inch)	98-3/4"
Weight: (lbs/lf)	43.14
Material:	hot dip galvanized (fence)
