

TRS-75-FF

#210404

Manual

■ Green up the roof!

Application:

External door entrances.

Installation instructions:

The grille should be placed on the top of the drainage layer. Removal of the four small circular pre-cut sections at the base of the grille will allow drainage directly into drainage layer. Alternatively the large central pre-cut circular section can be removed and the grille located directly above the rainwater outlet.

Installation Tools:

No special tools needed.
