

DIADEM®-350

Semi-intensive type of vegetated roof creating functional outdoor roof space

#810102

Manual

■ Green up the roof!

Application:

Within the existing space of the building, this type of installation creates a pleasant added green area that can be readily used by those working or living at the location.

Installation instructions:

Please follow the component and accessories installation instructions. Also follow the safety instructions for the use of gloves, glasses, and helmet while installing the green roof system.
